CAREER OBJECTIVE

Detail-oriented Computer Science student with a strong command of Full-Stack Development and Data Structures & Algorithms. Proven ability to build scalable web applications and solve complex algorithmic challenges (330+ LeetCode problems). Eager to leverage technical expertise in a fast-paced development team while driving innovation through real-world software solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, C++, Python
- **Frontend:** React.js, React Native, Expo, Angular, HTML5, CSS3 (Glassmorphism / Modern UI)
- **Backend & Database:** Node.js, Express.js, MongoDB, Firebase
- **Tools & Platforms:** Git/GitHub, Docker, Linux, RxJS, REST APIs

TECHNICAL PROJECTS

AQI Route Finder / Pollution Monitoring App

Tech Stack: React.js, Google Maps API, OpenWeather/WAQI API

- **Engineered** a dynamic route suggestion system that prioritizes user health by calculating paths with the lowest AQI levels.
- **Integrated** real-time API data to visualize zone-wise pollution metrics, providing users with immediate environmental awareness via interactive map overlays.
- **Optimized** front-end performance and UX through dynamic UI updates, ensuring seamless map interactions and real-time data rendering.

LeafLife.ai | AI-Driven Plant Disease Diagnostics

Tech Stack: React Native, Expo, TensorFlow Lite, FastAPI, Modern UI (Glassmorphism)

- **Developed** a mobile application during a high-pressure hackathon to identify plant diseases with high accuracy using AI-based image classification.
- **Implemented** a custom-trained model to analyze leaf patterns and provide immediate diagnostic feedback and treatment suggestions to users.
- **Designed** a high-fidelity "Glassmorphic" user interface, prioritizing clean aesthetics and an intuitive user journey for non-technical users.
- **Collaborated** closely within a cross-functional team to move from conceptual wireframes to a functional MVP within the competition's tight timeline.

EXPERIENCE & LEADERSHIP

Full-Stack Developer / Academic Project Lead | *Parul University*

- **Architected** scalable RESTful APIs using Node.js and Express, implementing optimized middleware to handle concurrent user requests with low latency.
- **Streamlined** complex CRUD operations by refactoring MongoDB schemas and aggregation pipelines, significantly improving data retrieval speeds and data consistency.
- **Developed** dynamic, responsive front-end interfaces in Angular, utilizing RxJS for efficient state management and seamless real-time data synchronization.

EDUCATION

- **Parul University**
- *Bachelor of Technology in Computer Science* | Graduation Year: 2027
 - **Current CGPA:** 6.58/10.00
 - *Relevant Coursework:* Data Structures & Algorithms, High-Performance Computing, Compiler Design.
- **St. Anne's Intermediate College**
- *Higher Secondary (12th Standard) - Science (PCM)* | Completion Year: 2023
 - **Percentage:** 73%
- **[Oxbridge School]**
- *Matriculation (10th Standard)* | Completion Year: 2021
 - **Percentage:** 71%

ACHIEVEMENTS & SOFT SKILLS

- **Competitive Coding:** Completed **330+** challenges on LeetCode focusing on efficient algorithmic solutions and optimal space/time complexity.
- **Soft Skills:** Problem Solving, Team Collaboration, Clear Communication, Quick Learner, Adaptability.
